About Magna

Magna is a brand of high-quality audio products whose DNA lies in design and performance, proudly handmade in Brazil.

From the very beginning, Magna products have been distinguished by their visual presence — whether artistic, discreet, or sculptural. When sound comes into play, a second enchantment emerges: clarity and power.

Every product is designed either to integrate seamlessly into the environment where it will be installed or to become a defining element when visibility is part of the experience.

In addition to the numerous finishing options available in the catalog, Magna offers full product customization, allowing each solution to adapt to any architectural or decorative project without compromising the sound quality already recognized as a signature of the brand.

Founded by Vision

Magna was created by two entrepreneurs who believed in a dream: to deliver world-class audio solutions through Brazilian engineering and design.

Luciano Vieira — Chief Technology Officer

Responsible for all product development, Luciano is extremely detail-oriented and ensures that every Magna product reaches exceptionally high quality standards while remaining intuitive and efficient to install.

Daniel Lima — Chief Design Officer

Daniel combines technical requirements with innovative design and impeccable finishes. Drawing from his experience in lighting techniques, he develops products that merge sound and light. He is also responsible for the brand's sales and marketing strategy.

Our natural stone and concrete elements are thoughtfully selected for both their aesthetic beauty and durability in outdoor settings. However, it is important to note that over time, natural stone surfaces may gradually lose some of their brightness and color due to weather exposure and environmental conditions. To maintain their appearance, we recommend periodic cleaning and routine care. Magna also provides covers to protect the speakers – sold separately.

BRUTALIST

SPEAKER & SUBWOOFER

OUTDOOR | INDOOR

The Brutalist Series expands into a complete architectural system with the introduction of the Brutalist S10-300, Brutalist S6-150 Subwoofer and the Brutalist Pathway – Satellite Speaker, while preserving the sculptural language of the original subwoofer. Carved from architectural concrete, the line maintains its minimalist geometry and refined finishes – Terracotta, Dark Gray, White, Mattone, Black, and Natural.

The series delivers deep, controlled, and physically engaging low-frequency performance, now complemented by elements that allow coherent, system-based architectural compositions. The Pathway – Satellite extends application flexibility and can incorporate integrated lighting, enabling it to function as both an audio and pathway lighting element.

Brutalist is no longer a single statement object, but a sound-architecture ecosystem where concrete, form, and performance converge to shape immersive spatial experiences.

BRUTALIST IN WHITE CONCRETE

MICRO-FRAMED

SPEAKER & SUBWOOFER

INDOOR

The Micro-Framed Series evolves with the introduction of the Micro-Framed Arrays, expanding the line into high-performance linear applications while preserving its minimalist identity. Inspired by the NoFrame philosophy, the series combines an ultra-slim frame with premium anodized finishes, ensuring elegant integration within the architectural plane.

Delivering full-range, high-fidelity sound, Micro-Framed offers stable imaging, excellent definition, and uniform coverage. The expansion of the line enables projects that require greater directivity control and scalability, while maintaining the same aesthetic coherence and sonic signature.

Designed with a shallow profile for installation in drywall ceilings or wood panels, the Micro-Framed Series strikes a precise balance between visual discretion, design flexibility, and reliable performance for premium residential environments.

AURA CYLINDER

SPEAKER & SUBWOOFER

OUTDOOR | INDOOR

The Aura Cylinder Series introduces a new expression of the Aura design language, exploring cylindrical geometry as an architectural and sculptural element. Available in full-range and subwoofer versions, the series retains the same finishes as the Aura line, now paired with natural stone or architectural concrete top plates.

Sonically, the Aura Cylinder delivers a refined, immersive, and well-balanced presentation, designed to fill open spaces with effortless authority. Its aesthetic transforms the audio system into an integrated architectural object, engaging directly with light, texture, and spatial volume.

The Aura Cylinder Series expands the Aura vocabulary, offering new compositional possibilities for projects that demand visual presence and acoustic performance in equal measure.

NANO SERIES

SPEAKER | ULTRA-SLIM

INDOOR

The Nano Series introduces a new family of architectural audio solutions focused on extreme visual discretion. With an ultra-slim 55 mm profile and shallow construction, the series is designed for in-wall installation in drywall or wood panel systems, virtually disappearing into the architecture.

Under the Nano Framed Series umbrella, the models combine controlled directivity, intelligibility, and tonal coherence in a minimal form factor, ideal for design-sensitive environments. Linear configurations further extend the series' applicability across distributed and fully integrated audio projects.

The Nano Series is Magna's answer to spaces where every millimeter matters — precise sound, invisible presence, and uncompromised architectural integration.

AUDIO PAD

SPEAKER | ULTRA-SLIM

INDOOR

The Audio Pad Series introduces a new category of architectural audio, enabling sound in places where traditional speakers are not viable. Designed for installation directly inside faceplates, it delivers discreet audio playback without adding visible elements to the environment.

Natively compatible with Decora faceplates and adaptable to other standards upon request, Audio Pad integrates seamlessly into smart home control points and auxiliary audio zones. It extends system coverage with precision, offering total integration freedom within the control ecosystem.

Precise sound, understated design, seamless integration.

ALLOY

SUBWOOFER

OUTDOOR | INDOOR

Alloy elevates audio design to a new level of contemporary sophistication, offering a collection of finishes that combine modernity and versatility. Available in ten painted versions and in the new special edition Argenta, with mirrored anodized aluminum, it integrates seamlessly into different spaces with unmistakable elegance.

Equipped with a 10" passive driver and a recommended 300W RMS amplifier, Alloy delivers impactful and immersive bass while adding a touch of brilliance and exclusivity to any environment. More than a subwoofer, it is a design piece that unites acoustic performance with avant-garde aesthetics.

APITO

PORTABLE BLUETOOTH SPEAKER & SUBWOOFER

OUTDOOR | INDOOR

The Apito, awarded as one of the Best Products of 2024 at the Cedia Expo by CE Pro, goes beyond its function, transforming any environment with its touch of elegance and versatility. Constructed from certified natural teak wood, it comes in four different finishes: Natural Teak, Teak with black, Teak with white, and the Ebonized version.

In addition to the Apito, Magna has developed a portable subwoofer for pairing. The Apito Sub features a sophisticated finish in its extruded aluminum cabinet, promising not only to enhance your sound experience but also to add a modern touch to your decor. The piece is available in black or white.

The Apito and Sub set transcend mere acoustic function; they provide a complete sensory experience. That transforms your home or office into a space of pure sound immersion and style.

CINEMARRAY

SOUNDBAR

INDOOR

The Cinemarray Soundbar Custom. Designed to redefine the concept of home cinema, this soundbar combines sophisticated design with unparalleled sound quality, transforming any space into a true cinematic experience.

With versatile installation options, allowing it to be mounted on the wall or in-wall, the Cinemarray Soundbar Custom adapts seamlessly to different space configurations, delivering both stereo and multichannel audio. Its robust design, featuring an MDF and aluminum ported enclosure, ensures durability and exceptional performance.

Equipped with state-of-the-art drivers – two 3" full-range and two 5" woofers – the Cinemarray offers a frequency response of 70Hz to 20KHz and a sensitivity of 93dB SPL, delivering a rich and immersive sound experience. Supporting 150W per channel amplifiers and 4 Ohms impedance, it fills any room with clear and powerful sound.

Additionally, the Cinemarray Soundbar Custom features PWM dimmable downlights, available in warm and natural white, adding a touch of elegance and functionality to your space. Discover the pinnacle of home audio with the Cinemarray Soundbar Custom – where innovation and performance converge to elevate your entertainment experience to a new level.

10

SPEAKER + SUBWOOFER

OUTDOOR

The Oasis, awarded Best Outdoor Product at Cedia Expo by rAve Pubs in both 2023 and 2024. Merges audio and art into a versatile furniture piece—a coffee table with various uses, introducing a level of functionality previously unseen in the market. Installed outdoors, it can be configured to be used as a fire pit, an ice bucket, or a simple coffee table. From the design perspective, a natural stone surface gives a quiet luxurious style that mixes with the textured woven cord wrapped around an aluminum frame, adding sophistication to any area. The optional fire pit can be ordered to be used with propane or natural gas (CSA Certified), made of stainless steel with up to 65,000 BTU of heat. It is also possible to choose between manual or electronic Bluetooth enable high/low ignition system.

Endorsing the tradition of the custom DNA of Magna, there are 11 natural stone options (marble, quartzite and granite) and 5 different woven rope choices, allowing a wide variety of finishes to match any décor. When used with the centered ice bucket, it is possible to choose from 10 colors variety. From the audio aspect, the Oasis uses an advanced DSP amplifier to power six 3" full range drivers that allow 360 degrees dispersion plus two 10" subwoofers, allowing frequencies as low as 30 Hertz, creating a smooth sound experience with a total of 200W. HDMI Arc connection allows integration with TVs, and it is possible to stream and make multiroom using AirPlay2 or Chromecast, with Tidal and Spotify Connect, allowing third-party integration or more than one table to stream simultaneously. Bluetooth is also available if Wi-Fi is not present.

POLLY SERIES

SPEAKER & SUBWOOFER

OUTDOOR

The external environment is the most challenging for a speaker. Firstly, the sun, excessive heat, rain, snow, and salt air punish outdoor products, causing technological parts such as speakers, connectors, and cabinets to spoil much faster than indoors. Secondly, quality loudspeakers need a rigid, non-resonant body. For this reason, Magna built its entire outdoor series using aluminum as the main component of its products.

The Polly Series has also expanded, now featuring the new Polly Sub 10 Dual, Polly Spot Mini 3, Polly Spot Mini 4, Polly Outland, and Polly Sub 8, which combine versatility with the signature sound quality of Magna Audio, offering solutions for different needs and environments.

POLLY 360°

It is an omnidirectional loudspeaker (available in 240° version) built with micro speakers distributed around its tower. The body includes a buried area equipped with a 10" subwoofer and LED lighting that can be dimmable. It is the ideal solution for large areas, as a single unit can cover up to 3,000sqft depending on the installation location.

POLLY IN SHINY GRAY

POLLY IN BLACK WITH BLACK LED

POLLY IN WHITE

POLLY TANK SUB

The Polly Tank Sub is poised to be a disruptive force redefining the outdoor audio experience. Instead of focusing on extremely low frequencies that are not felt outdoors and only annoy pets, Magna prioritized high SPL dispersion, so only one subwoofer can cover huge areas.

Tank is capable of delivering 124db in 38 hertz, and 127db from 50 to 85 hertz with a 101 dB sensibility – there is no other outdoor subwoofer that gets near that. To deliver this mass of sound, the Tank has three ports, allowing the performance to be outrageous, but with design-wise solutions, part of Magna DNA.

The design includes a natural stone over the piece that makes the subwoofer to be integrated into the outdoor project. Travertine finishing comes as the standard to the US market as most outdoor areas use this type of flooring, but any of the eleven Magna's natural stone options can be selected to customize the piece. In addition, five different woven cord covers can be used as a luxurious accessory, adding sophistication to any backyard.

The Tank uses a European 18" Driver, and it will assume the position of the most powerful outdoor subwoofer for the residential market, with, 1200W. The nominal impedance of 8 Ohms was planned to ease long cable runs, allowing upgrades of installations that use 4 Ohms subwoofers up to 600W.

BACKYARD SYSTEM: POLLY SPOT AND POLLY SUB

A landscape must impress with its performance and disappear into the terrain. The Backyard System is great for both situations. First, there are no other speakers on the market with their size, design, and performance. Secondly, the ten-color finishes make it vanish even in the most challenging environment.

POLLY SPOT IN WHITE

POLLY SPOT IN BLACK

POLLY SUB 10 IN CORTEN

BACKYARD ESSENTIAL: MINI POLLY SPOT 3 OR 4 AND POLLY SUB 8

Sleek design—that is your first and best impression when you see an Backyard Essential speaker. A huge sound is heard when you listen. Even from the small form factor models that were meant to be hidden in the garden, you get a big sound.

To match that size and power handling flexibility, there are ten color options, making the series a wild card for any project.

MINI POLLY SPOT 3 OR 4 IN BLACK

POLLY SUB 8 IN BLACK

POLLY SUB 8 IN BLACK

POLLY SUB 8

The Polly Sub 8 is an excellent option to increase the bass of your system. With a small cabinet, it is easy to install, making it simple to place in planters too, but its size does not reflect how powerful the sound is. The subwoofer's construction is strong, with an aluminum cabinet with ten options for powder coating, making it the ideal solution for outdoor systems.

POLLY SUB 8 IN BLACK

POLLY OUTLAND

Polly Outland has the pure Magna DNA. If you are looking for a small form factor landscape satellite, there is no better solution than Polly Outland. Built into a two-way system, it uses an 8" subwoofer for the low frequencies and a hi-performance 4" full-range driver for the mids and highs.

In a regular landscape or satellite outdoor system, you need big and hi-performance subwoofers to cover the whole area, and the entry systems don't deliver them. The Polly Outland delivers one subwoofer by satellite, making the bass extremely even in the covered area.

The small in-ground sub makes the installation easy and allows it to be placed in regular-sized planters when needed. The speaker construction is strong, with an aluminum cabinet with ten options for powder coating, making it the ideal solution for outdoor systems. Try the Polly Outland and be amazed.

POLLY OUTLAND IN BLACK

POLLY OUTLAND IN BLACK

AURA SERIES

SPEAKER & SUBWOOFER

OUTDOOR | INDOOR

Design has always been one of the main focuses for Magna. The Aura Series is a clear result of this DNA, whether you can not tell if it is a speaker or a wall lighting fixture. Aura is an all-purpose speaker, and it can be installed both indoors and outdoors, even in saunas, with LED lighting as optional. In addition, it has enormous versatility for installations, as it can be used both on the wall and on the ceiling.

Entirely built in aluminum, the Aura Series offers customizable body finishes, with anodized versions options and fabric or aluminum grills. Available in four different sizes, the line-up has two 40W models, one 60W, one 80W, and one with an incredible 125W performance, focused on significant outdoor areas, plus an 8" 200W subwoofer.

OUTLINE SERIES

SPEAKER & SOUNDBAR

INDOOR | OUTDOOR

The Outline Series offers a wide range of configurations to fit any type of project. Available with 1, 2, 3, 6, and 12 drivers, it is a versatile solution to be used from the home cinema, in distributed audio, or outdoors.

It is possible to add LED light, even in the soundbar, renewing its outlined style. The series is outdoor rated, including the 2 or 3 channels bars that can be customized to fit any TV or LED Display up to 10ft wide.

The Outline 3D Cinema integrates beauty with sound performance to the best home theater solution. For the best sound experience, the 3D Cinema uses a one-and-a-halfway to deliver incredible quality of mids and high frequencies. The speaker can be installed in as LCR and surround.

ROCK SERIES

SPEAKER & SUBWOOFER

INDOOR | OUTDOOR

Magna's Rock Series products are true works of art, crafted from the finest natural stones from Brazil, Italy, and Spain. The series offers three types of stone: Marble, Granite, and Quartzite, available in a wide range of finishes and styles, including semi-transparent crystals such as onyx and the White Brazilian Translucent, both of which can be illuminated. Using aluminum or stainless steel for the other components, the Rock Series products are also ideal for installation in outdoor areas.

There are two subwoofer options: S10-300 and S12-500. The S10-300, featuring a 10" driver, is a high-performance component that delivers 300W of power and impressive SPL. It can also be installed without feet, with the drivers facing backward, making it a unique decor piece. The S12-500, recently launched at Cedia Expo 2024, is a powerful 500W RMS subwoofer suitable for both indoor and outdoor use. With its 12" driver and natural stone construction, the S12-500 is designed to deliver deep, impactful bass, making it a standout addition to the Rock Series.

The series also includes a floor-standing model, awarded Best Outdoor Product at Cedia Expo 2022 by rAve Pubs. This tower features optional linear lighting for regular stones and a remarkable 300W output, outperforming any product in its range for outdoor areas.

NOFRAME SERIES

SPEAKER & SUBWOOFER

INDOOR

The NoFrame series of 3" and 4" has a clean and perfect design specially made for environments that use no-frame lighting fixtures with precisely the same finish as the speaker enclosures. The models have smaller sizes, which are compatible with most downlights. 3" model is available in two options, one of them called Extended Bass, which uses a port system to improve performance.

The wide dispersion of the 120 degrees woofer allows installations even at low height. Specially made for environments that use no-frame lighting fixtures and when subwoofers are not present. Clean and perfect square design for rooms where small sizes matter.

NOFRAME 3" IN WHITE RECESSED GRILL

DESIGNED MKII

SPEAKER

INDOOR

Designed by Magna is the only speaker series in the world that offers 25 different finishing combinations as standard, besides being the only one in its price range that allows 100% customization directly from the factory.

Handcrafted with a natural leather cabinet finish, it has the front panel in Italian matte gloss or two options of natural wood, and now debuts a refined ebonized front, expanding the design palette of the line.

The series now expands with the new DSF26 floorstanding model, created to deliver a pure stereo experience with an immersive, room-filling soundstage. With its commanding presence and architectural finishes, the DSF26 brings the same craftsmanship to larger spaces, establishing itself as a true statement in both performance and design.

Designed by Magna sounds as beautiful as it is.

NEW

DSF26

The DSF26 is the floorstanding expression of Magna's Designed Series, created to elevate high-end residential audio with architecture-grade finishes and an immersive, room-filling soundstage. Its commanding silhouette and refined details transform living rooms and dedicated listening spaces into environments of emotion and precision. The model debuts the new ebony front, which combines deep grain with a modern profile, and is available in a palette that includes light wood, dark wood, black lacquer, white lacquer, and exclusive editions finished in Italian leather. With clean lines and balanced proportions, the DSF26 integrates seamlessly into both classic and contemporary interiors.

Engineered for an enveloping and precise presentation, the DSF26 delivers articulate detail, stable imaging, and effortless dynamics. It is designed to reveal nuance even at low listening levels and to scale convincingly with authority when driven, making it an ideal choice for dedicated stereo systems. Beyond performance, it stands out for its aesthetic coherence, asserting itself as a statement piece without visual noise. Pairing easily with premium amplifiers and processors, it combines versatility with craftsmanship, where luxury materials and meticulous fit-and-finish uphold the standard of excellence that defines the Designed Series.

SUBWOOFER

Since most homes do not have a dedicated movie theater room, it's the ideal solution for living rooms used as a home theater, as its designs and finishes blend in with the environment and appeal to everyone from the hobbyist to the interior designers.

Performance, which is always the first thought of our technical staff, has not been set aside even in the subwoofer that was projected in the smallest possible size as it is always an ungrateful piece for decorators and wives. Be amazed by the performance of the best 10" subwoofers available on the market.

CENTRAL

The Central channel was designed to be as slim as it was possible so that it can be installed under TVs or screens without compromising the height of most racks on the market or requiring the image to be too high.
