

## AMP-3512

TruAudio's 12-channel power amplifier is the ideal solution for multi-room audio installations that demand both flexibility and premium sound quality. With a sleek design and rugged construction, this amplifier offers a range of features that make integration easy and performance exceptional. It includes individual input sensitivity controls for each channel, local source inputs per channel, dual BUS inputs (BUS 1 and BUS 2), channel bridging capabilities, and trigger in/out options for seamless control. Its specially designed toroidal transformers reduce heat buildup, helping to ensure long-term reliability and performance. Compatible with any brand of audio controller, this 12-channel amplifier delivers audiophile-grade sound and elevates the overall listening experience.

Specifications	AMP-3512
<b>Channels:</b>	12 channels, 6 zones
<b>Continuous Power:</b>	35 watts/ch @ 8 Ω
<b>Bridged Power Output:</b>	90 watts/ch @ 8 Ω
<b>Inputs:</b>	2- Global Ins (BUS), 2- Global Outs (BUS), 6- Local Inputs
<b>Impedance:</b>	8Ω
<b>Weight:</b>	27.5 lbs
<b>Rack Mount:</b>	Includes rack ears
<b>Dimensions (HWD):</b>	3.9" (99mm) H 16.4" (417 mm) W 14.5" (368mm) D
<b>Certification:</b>	ETL, CE (or CB scheme)
